

NB Private Equity Partners Limited

FUND OBJECTIVE

NB Private Equity Partners Limited ("NBPE" or the "Company") is a closed-end investment company registered under the laws of Guernsey managed by NB Alternatives Advisers LLC (the "Investment Manager"), an indirect wholly owned subsidiary of Neuberger Berman Group LLC.

Our investment objective is to produce attractive returns on capital by investing directly into Private Equity backed companies with a focus on capital efficient strategies while managing risk through portfolio diversification. NBPE pursues diversification across capital structure, asset class, vintage year, geography, industry and sponsor.

MANAGER COMMENTARY

During October, NBPE received \$50.3 million of proceeds from income investments, driven by \$45.9 million from the exits of second lien debt investments in Converge One, K&N Engineering and Evoqua and an additional \$4.4 million of principal and interest proceeds. Equity co-investments distributed \$0.8 million and fund investments distributed \$2.4 million, consisting primarily of distributions received from a mid-cap buyout fund. Also during the month, Extraction Oil & Gas (NASDAQ: XOG) completed an IPO and NBPE has valued its position based on the 31 October 2016 closing share price of \$21.36, making it the largest position in NBPE and bringing total public exposure in NBPE to 13% of net asset value.

In terms of new investments, NBPE funded a \$4.3 million follow-on investment to Engineering, an Italian IT firm, and \$0.2 million of additional follow-on investments. Fund investments called \$1.5 million during October, driven largely by a \$1.1 million contribution to a growth equity fund.

FUND MANAGER: NB ALTERNATIVES

- 29 years private equity investing experience
- Over \$40 billion of commitments managed
- Stable team with over 110 investment professionals with global presence
- Investments with over 200 private equity firms

LTM ORDINARY SHARE PRICE AND NAV PERFORMANCE (TOTAL RETURN) AND TRADING VOLUME

VALUATION METHODOLOGY

The Company carries its private direct equity investments on its books at fair value using the best information it has reasonably available to determine or estimate fair value. Publicly traded securities are valued based on quoted prices as of the last day of the relevant period less discounts to reflect legal restrictions, if any, that affect marketability. The Company determines such values for publicly traded securities held directly as well as known public positions held in the underlying private direct equity investments on a look-through basis. The Company estimates fair value for private interests based on a methodology that begins with the most recent information available from the general partner of the underlying fund or the lead investor of a direct equity investment, and considers subsequent transactions, such as drawdowns or distributions, as well as other information judged to be reliable that reports or indicates valuation changes, including realizations and other portfolio company events. The Company proactively re-values its investments before it has received updated information from the fund manager or lead investor if it becomes aware of material events that justify a change in valuation. If the Company concludes that it is probable an investment will be sold, the Company will adjust the fair value to the amount the Company expects to realize from the sale, net of transaction costs.

For debt investments, the Company estimates the enterprise value of each portfolio company and compares such amount to the total amount of such portfolio company's debt, as well as the level of debt senior to our interest in such portfolio company. Estimates of enterprise value are based on a specific measure (such as EBITDA, free cash flow, net income, book value or NAV) believed to be most relevant for the given portfolio company and compares this metric in relation to comparable company valuations (market trading and transactions) based on the same metric. In determining the enterprise value, the Company will further consider the portfolio companies' acquisition price, credit metrics, historical and projected operational and financial performance, liquidity as well as industry trends, general economic conditions, scale and competitive advantages along with other factors deemed relevant. Valuation adjustments are made if estimated enterprise value does not support the value of the debt security in which the Company is invested and securities senior to NBPE's position.

If the principal repayment of debt and any accrued interest is supported by the enterprise value analysis described above, the Company will next consider current market conditions including pricing quotations for the same security and yields for similar investments. To the extent market quotations for the security are available, the Company will take into account current pricing and liquidity. Liquidity may be estimated by the spread between bid and offer prices and other available measures of market liquidity, including number and size of recent trades and liquidity scores. If the Company believes market yields for similar investments have changed substantially since the pricing of our security, the Company will perform a discounted cash flow analysis, based on the expected future cash flows of the debt securities and current market rates. The Company will also consider the maturity of the investment, compliance with covenants and ability to pay cash interest when estimating the fair value of our debt investment.

NBPE expects to issue its quarterly report for the nine month period ended 30 September 2016 in November. The quarterly report will include unaudited financial information prepared in accordance with accounting principles generally accepted in the United States. NBPE is required to consider, and will consider, all known material information in preparing such quarterly report, including information that may become known subsequent to the issuance of this monthly report. Accordingly, amounts included in the quarterly report may differ from this monthly report.

TRADING VOLUME AND SHARE REPURCHASE ACTIVITY

During the month of October, NBPE's aggregate trading volume on Euronext Amsterdam, the London Stock Exchange, and over-the-counter trading platforms was 575,536 Class A ordinary shares, which represents an average daily trading volume of approximately 27,406 Class A ordinary shares.

The Share Buy-Back Programme expired on 31 May 2016; however, the programme remains an option to the Company in future periods, if deemed suitable by the Directors at a later time. As of 31 October 2016, there were 48,790,564 class A ordinary shares and 10,000 class B ordinary shares outstanding, with 3,150,408 class A ordinary shares held in treasury.

- Figures provided are unaudited and subject to change. Certain numbers may not total due to rounding.
- Other includes realised gains, investment income not classified as yield income, management and administration fees, performance fee, tax and other expenses, changes to the ZDP liability and value changes to other assets and liabilities.
- NBPE declared a \$0.25 per Share dividend on 12 July 2016, paid on 31 August 2016. On an annualised basis, this dividend payment represents a dividend yield of 3.3% based on the estimated October 2016 NAV and 4.3% based on the Euronext closing price of \$11.50 on 26 October 2016.
- The diversification analysis by asset class and investment type is based on the fair value of underlying fund investments and direct/co-investments. The diversification analysis by year of investment, geography and industry is based on the diversification of underlying portfolio company investments at fair value as estimated by the Investment Manager. The year of investment is calculated at the portfolio company level and is defined as the date of capital deployment into a particular underlying investment. The diversification by year of investment also includes an allocation of net cash flows and valuation adjustments made since financial statements were last received from the investment sponsor. Accordingly, the actual diversification of the Company's investment portfolio and the diversification of the Company's investment portfolio on an ongoing basis may vary from the foregoing information.
- Direct equity investment diversification includes all equity, including associated equity from income investments.
