NBPE – EFFICIENT PRIVATE EQUITY

We believe NBPE offers access to a diverse private equity and income portfolio at a lower cost than many other listed private equity vehicles

Listed Fund of Funds

- Charge double layer of fees
 - Often 1.5% - 2.0% management fee on committed capital and 20% carry at the underlying fund level in addition to fund of funds fees & carry
- Hyper-diversified portfolios
- Potential for significant capital structure risk from any over commitment strategy and / or return dilution from cash drag

Listed Direct Funds

- Single layer of fees, but at a higher level
 - 1.5% management fee on NAV (or NAV + committed capital) and 15 – 20% carry
- Concentrated lead manager risk and often more concentrated portfolio
- Multiple “direct” vehicles invest in third party funds and have multiple layers of fees

NBPE

- Single layer of fees on direct investments
 - 1.5% on NAV and 7.5% performance fee
- Appropriately diversified with multiple top tier managers
- Low over commitment risk

Note: Fee characteristics are described generally above and are typical fees in direct and fund of funds. Fees may vary and the examples above are based on the Manager's assessment of the current market

ATTRACTIVE VALUE PROPOSITION

We believe NBPE continues to offer a compelling investment opportunity

- Capital appreciation and growth from equity investments
- Strong NAV development and portfolio performance in 2017
- Income through an attractive dividend, supported by the cash yield from the income portfolio and investment realisations
- Strong capital structure and commitment coverage
- Private equity exposure with attractive fee structure – direct investments in portfolio typically feature lower all-in fees than investing directly into LP funds

APPENDIX

FUND INVESTMENT PORTFOLIO LIQUIDITY

ENDNOTES

1. The diversification analysis by geography, industry and vintage is based on the fair value of underlying fund investments and direct/co-investments; the diversification analysis for company size is based on the fair value of the underlying direct/co-investments and the fair value of funds with a focus on the company size described. Determinations regarding geography, industry, vintage and company size represent the Investment Manager's estimates. Accordingly, the actual diversification of our investment portfolio and the diversification of our investment portfolio on an ongoing basis may vary from the foregoing information. For the NB Alternatives Direct Co-investment Program and the NB Healthcare Credit Investment Program commitments, total exposure only reflects the funded investments to date. Unfunded amounts and unfunded percentages within each of these programs are excluded from the analysis, as capital deployment is opportunistic and cannot be accurately forecast at this time.
2. Guidance regarding NBPE's future portfolio and performance is a target only and not a profit forecast. There can be no assurance that this target will be met or that the Company will make any future distributions whatsoever. Any such changes will be notified to shareholders through a regulatory information service. NBPE's Board of Directors will continue to evaluate the Company's financial position, annual dividend target and the timing of future dividends. Future dividend payments will be announced by NBPE after the Board of Directors have completed such evaluation.
3. Yield to maturities represent the return (IRR) from this reporting period to maturity of the investment. Includes a portfolio of small business loans at an interest rate at least at the rate stated above but not included in the yield calculations.
4. Actual unfunded commitments are \$254.5 million at 30 April 2018, corresponding to actual over commitment of \$101.7 million and an actual commitment coverage ratio of 60.0%. Unfunded commitments are adjusted for funds past their investment period (except for reserves which may be called) and amounts which NBPE has the right to terminate if it so chooses.
