COMPANY OVERVIEW

NB Private Equity Partners Limited ("NBPE" or "the Company") is a closed-end investment company registered under the laws of Guernsey managed by NB Alternatives Advisers LLC (the "Investment Manager"), an indirect wholly owned subsidiary of Neuberger Berman Group LLC. NBPE invests in private equity funds managed by leading sponsors, including fund of funds managed by the Investment Manager, and makes direct private equity investments alongside leading sponsors ("co-investments"). NBPE's investment objective is to produce attractive returns on its capital from its private equity investments while managing investment risk through portfolio diversification across asset class, vintage year, geography, industry and sponsor.

INVESTMENT MANAGER COMMENTARY

During March, NBPE approved a \$10 million commitment to Oaktree Opportunities Fund VIII, a special situations fund focused on investing in the debt of financially distressed companies. In addition to this new investment, NBPE sold a portion of its interest in a large-cap buyout fund and agreed to the sale of the remaining interest in a separate transaction. The Company received the proceeds of the first sale in March; the second transaction has yet to close, but this fund continues to be valued at the amount NBPE expects to realize from the sale. The sales of this fund will result in a small increase in liquidity and will reduce unfunded commitments by an aggregate \$13.9 million, if and when the second transaction closes. We believe NBPE can generate more attractive risk-adjusted returns by re-deploying this capital into other private equity investments.

Including this activity, NBPE invested \$4.1 million in private equity investments and received \$4.2 million of distributions during the month. As a result of this investment activity, the Company's private equity investment level stayed constant at 110% of net asset value at 31 March 2010. During March, approximately 60% of capital calls were invested in special situations / distressed funds, 28% were invested in buyout funds and 12% were invested in growth equity / venture funds. The distributions received in March were diversified across a number of investments, with 61% from buyout funds, 36% from special situations / distressed funds and 3% from NB Crossroads Fund XVII. In addition, the Company paid down \$30.8 million of principal on its credit facility during March.

As of 31 March 2010, the unaudited net asset value per share was \$9.55, which represents an increase of 1.0% compared to the unaudited net asset value per share of \$9.46 at 28 February 2010. During March, NBPE's portfolio value increased due to \$3.2 million of unrealized gains on credit-related fund investments, \$2.1 million of unrealized gains related to public equity securities and \$0.2 million of positive foreign exchange adjustments.

31 March 2010¹**VALUATION METHODOLOGY**

The Company carries its private equity investments on its books at fair value using the best information it has reasonably available to determine or estimate fair value. Publicly traded securities are valued based on quoted prices as of the last day of the relevant period less discounts to reflect legal restrictions, if any, that affect marketability. The Company determines such values for publicly traded securities held directly as well as known public positions held in the underlying private equity investments on a look-through basis. The Company estimates fair value for private interests based on a methodology that begins with the most recent information available from the general partner of the underlying fund or the lead investor of a direct co-investment, and considers subsequent transactions, such as drawdowns or distributions, as well as other information judged to be reliable that reports or indicates valuation changes, including realizations and other portfolio company events. The Company proactively re-values its investments before it has received updated information from the fund manager or lead sponsor if it becomes aware of material events that justify a change in valuation. If the Company concludes that it is probable an investment will be sold, the Company will adjust the carrying value to the amount the Company expects to realize from the sale, exclusive of transaction costs.

NBPE expects to issue its interim management report for the quarter ended 31 March 2010 in mid to late May. The report will include unaudited financial information prepared in accordance with accounting principles generally accepted in the United States. NBPE is required to consider, and will consider, all known material information in preparing such financial report, including information that may become known subsequent to the issuance of this monthly report. Accordingly, amounts included in the interim management report may differ from this monthly report.

LIQUIDITY ENHANCEMENT AGREEMENT

On 21 July 2008, the Company entered into a Liquidity Enhancement Agreement with ABN AMRO Bank N.V. London Branch ("ABN") in order to enhance and strengthen the liquidity in the trading of NBPE's Class A ordinary shares on Euronext Amsterdam by NYSE Euronext ("Euronext Amsterdam"). Under the terms of the Liquidity Enhancement Agreement the Company has granted to ABN sole discretion, in the name and for the account for the Company, to effect (subject to any required shareholder authority, all applicable legal and regulatory requirements and within certain agreed parameters) repurchases and sales out of treasury of the Company's Class A ordinary shares on Euronext Amsterdam. During March 2010, there were no shares repurchased under the Agreement. As of 31 March 2010, there were 51,059,592 Class A ordinary shares and 10,000 Class B ordinary shares outstanding, with 3,150,408 Class A ordinary shares held in treasury.

1. Figures provided are unaudited and subject to change. Certain numbers may not total due to rounding.

2. The diversification analysis by asset class and investment type is based on the fair value of underlying fund investments and co-investments (including unfunded commitments on a total private equity exposure basis). The diversification analysis by year of investment, geography and industry is based on the diversification of underlying portfolio company investments at fair value as estimated by the Investment Manager. The year of investment is calculated at the portfolio company level and is defined as the date of capital deployment into a particular underlying investment. For primary investments and co-investments, the vintage year is defined as the date of the first portfolio investment or the date of the co-investment. For secondary investments, the vintage year is defined as the date of the secondary acquisition. The diversification by year of investment also includes an allocation of net cash flows and valuation adjustments made since financial statements were last received from the investment sponsor. Determinations regarding asset class, investment type, geography and industry, as well as the allocation of unfunded commitments on a total private equity exposure basis, also represent the Investment Manager's estimates. Accordingly, the actual diversification of the Company's investment portfolio and the diversification of the Company's investment portfolio on an ongoing basis may vary from the foregoing information.

This document is not intended to be an investment advertisement or sales instrument; it constitutes neither an offer nor an attempt to solicit offers for the securities described herein.
