Appendix – Sustainability Potential of Investments

Sustainability Potential of Investments: Companies may have a range of effects on employees, the community, and the environment through their operations and products and services. The Manager believes that companies that exhibit leadership in managing material environmental, social, and governance considerations, are also often more resilient, competitively positioned, and exhibit lower risk profiles. Furthermore, companies that contribute positively to solutions addressing sustainability challenges are by their nature, essential. These business models may benefit from macroeconomic and demographic trends while also contributing meaningfully to addressing global social and environmental challenges, such as outlined by the United Nations Sustainable Development Goals (“UN SDGs”). Sustainable companies, by their nature, seek to manage risks, not only related to adverse social outcomes, but also ones that might harm their license to operate.

The Investment Manager defines sustainability potential as:

- Adverse sustainability potential as companies whose operations or products/services contribute to significant adverse outcomes for people or the environment, such as outlined by the United Nations Global Compact (“UNGC”), United Nations Guiding Principles (“UNGP”), and OECD Guidelines for Multinational Enterprises (“OECD Guidelines”);
- Positive sustainability potential as companies that have an overall positive benefit to people or the environment, such as outlined by the UNGC, UNGP, OECD Guidelines for Multinational Enterprises;
- Significantly positive sustainability potential as companies whose products or services offer solutions to long-term sustainability challenges such as outlined by the UN SDGs.

The Investment Manager strives to identify and invest in companies that are deemed to have positive sustainability potential while avoiding exposure to companies that have known ESG-related controversies or business models deemed to have adverse sustainability potential as defined by the Exclusions outlined herein.

Endnotes

1. As of 30 November 2021. Analysis includes 17 IPOs and 28 full direct equity investment exits since June 2016. For investments which completed an IPO, the value is based on the closing share price on the IPO date; however NBPE remains subject to customary IPO lockup restrictions. Returns are presented on a "gross" basis (i.e. they do not reflect the management fees, carried interest, transaction costs and other expenses that may be paid by investors, which may be significant and will lower returns). Past performance is not a guarantee of future returns.
2. The MSCI World Index captures large and mid-cap representation across 23 Developed Markets (DM) countries. With 1,555 constituents, the index covers approximately 85% of the free float-adjusted market capitalization in each country (MSCI World Factsheet, 30 November 2021). The benchmark performance is presented for illustrative purposes only to show general trends in the market for the relevant periods shown. The investment objectives and strategies in the benchmark may be different than the investment objectives and strategies of NBPE and may have different risk and reward profiles. A variety of factors may cause this comparison to be an inaccurate benchmark for any particular fund and the benchmarks do not necessarily represent the actual investment strategy of a fund. It should not be assumed that any correlations to the benchmark based on historical returns would persist in the future. Indexes are unmanaged and are not available for direct investment. Investing entails risks, including possible loss of principal. Past performance is no guarantee of future results.
3. The FTSE All-Share Index represents the performance of all eligible companies listed on the London Stock Exchange's (LSE) main market, which pass screening for size and liquidity. The index captures 98% of the UK's market capitalization (FTSE All Share Factsheet, 30 November 2021). The benchmark performance is presented for illustrative purposes only to show general trends in the market for the relevant periods shown. The investment objectives and strategies in the benchmark may be different than the investment objectives and strategies of NBPE and may have different risk and reward profiles.
