ENDNOTES

Endnotes

1. The diversification analysis by asset class and investment type is based on the fair value of underlying fund investments and direct/co-investments. Determinations regarding asset class and investment type represent the Investment Manager's estimates. Accordingly, the actual diversification of our investment portfolio and the diversification of our investment portfolio on an ongoing basis may vary from the foregoing information. For the NB Alternatives Direct Co-investment Program and the NB Healthcare Credit Investment Program commitments, total exposure only reflects the funded investments to date. Unfunded amounts and unfunded percentages within each of these programs are excluded from the analysis, as capital deployment is opportunistic and cannot be accurately forecast at this time.
2. The diversification analysis by geography is based on the diversification of underlying portfolio company investments at fair value as estimated by the Investment Manager. Determinations regarding geography and industry also represent the Investment Manager's estimates. Accordingly, the actual diversification of our investment portfolio and the diversification of our investment portfolio on an ongoing basis may vary from the foregoing information. For the NB Alternatives Direct Co-investment Program and the NB Healthcare Credit Investment Program commitments, total exposure only reflects the funded investments to date. Unfunded amounts and unfunded percentages within each of these programs are excluded from the analysis, as capital deployment is opportunistic and cannot be accurately forecast at this time.
3. Guidance regarding NBPE's future portfolio and performance is a target only and not a profit forecast. There can be no assurance that this target will be met or that the Company will make any future distributions whatsoever. Any such changes will be notified to shareholders through a regulatory information service. NBPE's Board of Directors will continue to evaluate the Company's financial position, annual dividend target and the timing of future dividends. Future dividend payments will be announced by NBPE after the Board of Directors have completed such evaluation.
4. Yield to maturities represent the return (IRR) from this reporting period to maturity of the investment. Includes a portfolio of small business loans (\$17.5 mm of fair value) at an interest rate at least at the rate stated above but not included in the yield calculations. The Taylor Precision Products debt notes currently pay 13% cash, but issuer has the option to pay 11% and 2% PIK.
5. Actual unfunded commitments are \$285.4 million at 31 August 2015, corresponding to an actual over commitment level of 124.0 million and an actual commitment coverage ratio of 57%. Figures include \$150 million committed to a new NB Alternatives Co-investment Program. Unfunded adjustments include removing unfunded commitments to funds past their investment period (although some amount may be called for future follow-ons or expenses), unfunded commitments to fund of funds managed by the Manager, and adjusting the unfunded commitment to one investment in the income category where the Manager does not expect capital drawn to exceed 40% of the original commitment due to daily paybacks.
